**HBA HINDUSTAN BOOK AGENCY**

## Summary

**Hindustan Book Agency (HBA)** is the publisher and distributor of advanced level books in mathematics and physics. HBA has published books jointly with Springer, Birkhauser, Cambridge University Press, World Scientific Press, American Mathematical Society and Princeton University Press. It publishes established series in mathematics, Texts and Readings in Mathematics, and a similar series in physics entitled, Texts and Readings in Physical Sciences.

[iG Publishing Site](#) | [Publisher URL](#)

## Unique Features

Publications, carefully chosen by the Editorial Board, deal with important topics in mathematics, physics and their applications. Senior students, Ph.D. scholars, students of science and engineering with a serious interest in mathematics, and college and university teachers who want to augment their old courses with new material, find these books useful.

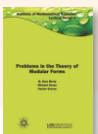

## Special Highlights

Physical Sciences , Mathematics, Culture and History of Mathematics

## Benefits to Users

The standard of exposition is high. Moreover, every attempt is made to be pedagogical; background material not found in standard texts is clearly explained, making the books accessible to a large audience.

## Title Highlights

A foundation course in mathematics
