

FACT SHEET

IntechOpen

Summary

Since its founding in 2004, IntechOpen has collaborated with over 117,000 authors and editors, focused on quality, peer-reviewed research and the dissemination of knowledge. IntechOpen's global community includes key opinion leaders of the international academic and scientific community, including Nobel Laureates and the top 1% of the world's most-cited authors.

IntechOpen published over 4,400 eBooks across the Physical Sciences, Engineering & Technology; Life Sciences; Health Sciences and the Social Sciences and Humanities, including Business, Management and Economics and have amassed over 84,800 Citations in Web of Science.

IntechOpen believe that scientific progress is generated by collaboration, that the playing field for scientific research should be levelled globally, and that research conducted in a democratic environment, believing that with the use of innovative technologies, research should be made available to anyone.

Special Features

A truly global resource, packages are searchable and the metadata can be loaded into library catalogues. Some of the world's leading scientists have contributed chapters, including a number of Nobel Prize winners.

Benefits to the Users

Access to many thousands of searchable book chapters from the global research community. It also offers greater discoverability and more visibility for the authors

Title Highlights

Infrared spectroscopy :
materials science, engineering and technology

[READ MORE](#) >

Abiotic stress in plants :
mechanisms and adaptations

[READ MORE](#) >

Anopheles mosquitoes :
new insights into malaria vectors.

[READ MORE](#) >

Industrial robotics:
programming, simulation and applications

[READ MORE](#) >

Face recognition

[READ MORE](#) >

Swarm intelligence, focus on ant and particle swarm optimization
