Special Highlights

Acoustics, Bioengineering, Design & Nature, Electrical Engineering & Electromagnetics, Environmental Health, Historical Interest, Materials & Manufacturing, Risk and Security, Transport Engineering, Air Pollution, Boundary Elements, Earthquake Engineering, Energy, Fluid Mechanics, Information & Communication Technologies, Mathematics & Statistics, Structural Engineering, Water Resources, Architecture, Damage & Fracture Mechanics, Ecology, Environmental Engineering, Heat Transfer, Marine & Offshore Engineering, Numerical Methods for Engineering, Sustainable Development

Title Highlights

Computational methods and experimental measurements XIX & earthquake resistant engineering structures XII

[READ MORE](#)

Management and applications of complex systems

[READ MORE](#)

Eco-architecture VII : harmonisation between architecture and nature

[READ MORE](#)

Complex systems studies

[READ MORE](#)

Sustainable development and planning X

[READ MORE](#)

Urban transport XXIV

[READ MORE](#)

Energy production and management in the 21st century III: the quest for sustainable energy

[READ MORE](#)

Building information systems in the construction industry

[READ MORE](#)

Boundary elements and other mesh reduction methods

[READ MORE](#)

High performance and optimum design of structures and materials III
