

**REFERENCE** Stay connected to top welding issues, trends, and changes

Get the latest developments affecting the welding industry; ask or answer technical questions with your peers; or boost your career or company's bottom line by enhancing your knowledge of technological advancements, standards, processes, safety practices, or management techniques.

**JOURNAL** The Welding Journal has been published continually since 1922 — an unmatched link to all issues and advancements concerning metal fabrication and construction. This monthly periodical delivers news of the welding and metal fabricating industry. Stay informed on the latest products, trends, technology and events via in-depth articles, full-color photos and illustrations, and timely, cost-saving advice. Also featured are articles and supplements on related activities, such as testing and inspection, maintenance and repair, design, training, personal safety, and brazing and soldering. Additionally, the Welding Journal includes peer reviewed research articles highlighting the latest developments in metallurgy, welding technology and engineering.

**American Welding Society**  
LEARNING

“Advancing the science, technology, and application of welding and allied joining and cutting processes, including brazing, soldering and thermal spraying.”
