

SCIENCE, ENGINEERING AND TECHNOLOGY

Specializes in Academic

The Institute of Engineering and Technology (IET) specializes in academia by providing a platform for engineers and technicians worldwide to advance their knowledge and skills. Through resources, events, and publications, the IET fosters professional development, research initiatives, and collaboration to drive innovation in the engineering field.

Categories and subjects

The Institute of Engineering and Technology (IET) covers a diverse range of subjects and categories in engineering, including electrical engineering, electronics, telecommunications, control systems, energy, computing, and transportation. Their publications and resources cater to professionals and researchers in various fields of engineering.

About

The Institute of Engineering and Technology (IET) is a prominent global engineering institution with 169,000 members across 150 countries. Committed to engineering a better world, the IET inspires, informs, and influences engineers, technicians, and individuals impacted by engineering advancements.
