

SCIENCE, ENGINEERING AND TECHNOLOGY

Specializes in Academic

AI+ Library serves academic institutions end-to-end, from primary schools to university faculties. Universities gain coverage across ten faculties, from Medicine to Law to Engineering; schools get safeguarding-first, curriculum-ready guides for teachers, leaders and specialists — one adopt-once collection for the campus.

Categories and Subjects

Categories span four tiers: AI+ Essentials (foundational literacy), AI+ Job Roles (healthcare, law, engineering, finance, education, government and more), AI+ Job Skills (writing, research, data analysis, negotiation, strategy), and Special Editions (State of AI reports, ethics, leadership, The Prompts Prima).

AI+ Essentials

Foundational AI literacy for everyone — read before anyone specialises into a role or skill.

AI+ Job Roles

The heart of the library — a dedicated book for every major profession, from doctors to civil servants.

AI+ Job Skills

Cross-cutting skills that layer onto any role — writing, research, negotiation, strategy.

Special Editions

Research and strategy for leaders — State of AI reports, ethics, The Prompts Prima.

About

AI+ Library, published by the Straits Institute for Applied AI is the world's largest Applied AI collection — 300+ titles across 166 professions and 96 transferable skills, published by the Straits Institute for Applied AI, refreshed every six months to stay current and practitioner-verified.
