Specializes in Academic

The Royal Society of Chemistry specializes in publishing rigorous chemical science research, education resources, and professional development; it's academic-focused, serving researchers, faculty, librarians, students, and industry professionals seeking curated, peer-reviewed materials and trusted governance worldwide, and long-standing quality standards globally.

Categories and Subjects

Key subjects include: Chemistry, Analytical Chemistry, Biochemistry, Catalysis, Materials Science, Organic Chemistry, Inorganic Chemistry, Physical Chemistry, Nanoscience, Environmental Chemistry, Chemical Education, Green Chemistry, Computational Chemistry, Molecular Biology, Spectroscopy, Electrochemistry, and allied disciplines, interdisciplinary interfaces, and policy-focused topics for researchers worldwide.

About

The **Royal Society of Chemistry** is a global, nonprofit publisher and professional association with a century of advancing chemical sciences. RSC publishes high-quality ebooks across organic, inorganic, physical, analytical, materials chemistry, and beyond, backed by peer review, practical lab guidance, and curricula-aligned resources.
